Summary

Full-stack software engineer with 2+ years of experience building production web applications, dashboards, and internal business platforms. Experienced with React.js, Next.js, TypeScript, Tailwind CSS, Go, Node.js, PostgreSQL, REST APIs, and modern state management. Worked across CRM, payroll automation, Web3 trading dashboards, geospatial intelligence, AI reporting, and data-driven simulation tools, with a focus on clean UI, scalable architecture, performance, and client-focused delivery.

Skills

Languages: JavaScript, TypeScript, Go, Python, HTML, CSS

Frontend: React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, SASS, Bootstrap

Backend: Node.js, Go REST APIs, PostgreSQL, Redis, Supabase, Express.js

State & UI: Zustand, Redux, Pinia, Material UI, Ant Design, FormKit, Shadcn/ui

Web3 & AI: Wagmi, Viem, WalletConnect, MetaMask, OpenAI API

Tools & Deployment: Git, GitHub, Vercel, Netlify, Railway, GitHub Pages

Other: Leaflet, React Leaflet, Recharts, TradingView, GSAP, Particles.js

Work Experience

Golden Gate Innovations

Dec 2025 – Current

Software Engineer – Lahore, Pakistan

- Built and maintained production web applications across Next.js, React, TypeScript, Tailwind CSS, Zustand, and REST APIs for CRM, analytics, geospatial, AI, and Web3 client platforms.
- Developed a Go and PostgreSQL operations platform with employee management, payroll processing, reimbursement workflows, Supabase JWT authentication, Dropbox uploads, Resend email delivery, and Chrome-based PDF payslip generation.
- Implemented interactive dashboards with filtering, pagination, role-aware flows, map-based scenario visualization, formula-driven simulations, report generation, and Excel import/export workflows.
- Collaborated directly with clients and cross-functional teams to gather requirements, ship iterative releases, and maintain delivery quality across multiple concurrent projects.

Datum Brain

Sep 2023 – Dec 2025

Software Engineer – Lahore, Pakistan

- Engineered and optimized scalable web applications using React.js, Vue.js, Next.js, and Tailwind CSS, reducing load times from 8 seconds to under 3 seconds.
- Conducted client meetings to gather requirements and provide progress updates, improving client satisfaction.
- Collaborated closely with cross-functional teams to maintain high-quality delivery standards.

Shayan Solutions

Jun 2023 – Sep 2023

Full Stack Developer – Intern, Lahore, Pakistan

- Built an AI-based content generator using Next.js.
- Integrated OpenAI APIs for intelligent content generation.
- Implemented Stripe and PayPal payment gateways.
- Worked on both SSR and CSR architectures.

Systems Limited

Aug 2021 – Nov 2021

Salesforce Back-end Developer – Intern, Lahore, Pakistan

- Explored Salesforce architecture and core backend concepts.
- Studied and practiced SFRA architecture flows.

Freelancer

Aug 2021

Full Stack Developer – Web & Mobile, Lahore, Pakistan

- Integrated AI-trained models into web applications using Next.js.
- Developed a library management system in Next.js.
- Integrated AI models into mobile applications using Flutter.

Education

Bachelor of Science in Computer Science University of Engineering and Technology, Lahore, Pakistan	2019 – 2023
FSc Pre-Engineering Aspire College, Lahore, Pakistan	2017 – 2019
Matric in Computer Science Society Public School, Lahore, Pakistan	2015 – 2017

Open Source Contributions

BYOJS Storage – Contributor github.com/BYOJS/storage/pull/6	Dec 2024
Contributed bulk <code>getMany</code>, <code>setMany</code>, and <code>removeMany</code> APIs for a JavaScript key-value storage library, covering local storage, session storage, IndexedDB, and cookie adapters.	

Projects

GGI Operations Platform – Full-Stack Developer

- Built an internal operations platform for employee management, payroll, reimbursements, departments, users, and salary slip workflows.
- Developed Go and PostgreSQL APIs with Supabase JWT authentication, role-aware access, database migrations, and RESTful endpoints.
- Implemented automated payslip PDF generation, bulk salary email delivery, Dropbox receipt uploads, and Resend email integration.

Technologies: Go, PostgreSQL, Next.js, React.js, TypeScript, Tailwind CSS, Supabase, Dropbox API, Resend

Web3 Vault and Trading Dashboard – Full-Stack Developer

- Developed vault, trader, investor, wallet authentication, settlement, profit tracking, and trading service modules.
- Developed a multi-asset trading platform with real-time charts, secure wallet connectivity, and automated signal generation.
- Implemented wallet connectivity, SIWE-style authentication flows, Redis caching, PostgreSQL persistence, and real-time trading state handling.
- Built dashboard interfaces for portfolio visibility, vault operations, market data, and transaction workflows.
- Implemented TradingView and Recharts for live market visualization.

Technologies: Go, Next.js, React.js, TypeScript, PostgreSQL, Redis, Wagmi, Viem, WalletConnect, Zustand

Pakistan Energy Crisis Scenario Simulator – Frontend Developer

- Built an interactive scenario-planning dashboard for energy supply disruption analysis, inventory modeling, pipeline risk, pricing impact, and conservation triggers.
- Implemented formula-driven modules, scenario presets, traceable calculations, vessel/corridor visualizations, and exportable reports.
- Added Excel import/export support and structured report views for analyst workflows.

Technologies: Next.js, React.js, TypeScript, Tailwind CSS, Zustand, Excel Export, Data Visualization

Smart City Geospatial Intelligence Dashboard – Frontend Developer

- Built map-based interfaces for smart city monitoring, camera intelligence, incidents, scenarios, and war-gaming style geospatial workflows.
- Integrated interactive maps, scenario stores, filters, UI state management, and responsive dashboard components.
- Developed reusable services and adapters for scenario details, camera data, intelligence layers, and map controls.

Technologies: Next.js, React.js, TypeScript, Tailwind CSS, Leaflet, React Leaflet, Zustand

AI Security Reporting Assistant – Frontend Developer

- Built an AI-powered security assistant with chat-based vulnerability analysis and report generation workflows.
- Integrated OpenAI chat APIs, streaming-style request handling, report state management, and downloadable report UI components.
- Designed reusable glass-style UI components and responsive layouts for security analysis dashboards.

Technologies: Next.js, React.js, TypeScript, Tailwind CSS, OpenAI API

Restaurant Ordering Platform – Frontend Developer

- Built customer-facing restaurant discovery, catalog, store detail, cart, checkout, payment, address, and account flows for a direct-from-restaurant ordering platform.
- Developed reusable React components for store cards, catalog sections, item ordering, cart summaries, fulfillment selection, search, and partner-themed embedded layouts.
- Integrated API-driven workflows using TanStack Query, generated API clients, Marketfront session handling, and event callbacks for store selection, item add, checkout start, and order completion.

- Supported partner super-app embedding through the web component and Vite shell builds.

Technologies: React.js, TypeScript, Vite, TanStack Router, TanStack Query, Panda CSS, Capacitor, REST APIs, Marketfront SDK

Electronic Money Institution (EMI) Platform – Frontend Developer

- Developed web performance, authentication, and compliance management features.
- Integrated regulatory and client-specific APIs.

Technologies: Vue.js, Tailwind CSS, FormKit

Language Learner / Translator App (2024) – Full-Stack Developer

- Built a language learning and translation platform with AI-powered exercises.
- Integrated Google Translate and OpenAI APIs.
- Developed backend services using Go and Python.

Technologies: React.js, Tailwind CSS, Go, Python, OpenAI API
